## Do you love your life?

Walking a tightrope takes skill, but do you want to?

We would all like to live our lives more freely and fully... but something seems to hold us back. If we could see what this “something” is, we

could take steps to remove it from our life, or at least figure out how to get around it. But we get busy with our family, work, and obligations and our dream of living a fulfilling, joyful life takes a backseat to day-to-day details. It feels like walking a tightrope... with no end in sight.

### Are you ready to release the past and live the life of your dreams?

Walking a tightrope takes skill. No doubt about it. But getting off requires courage – the courage to dream bigger and chart your own course through life, the courage to search your soul for the issues which have been keeping you from life’s greatest treasure – your own freedom. Fortunately, you don’t have to do this all alone. And it’s easier than you might think. You have two very experienced, dedicated guides for this journey within – Susan Levy and Marcella Zinner.

Susan and Marcella have developed a two-step program that truly opens your eyes to your incredible potential. Astrology gives the overall picture and direction of where to find the “stuck” issues; past life regression reveals the details so you can resolve them once and for all... and open yourself to joy, love and deep fulfillment.

### Susan Levy and Karmic Astrology

Susan begins with an astrological review. Your astrology chart is a “Cosmic Blueprint” for your life and graphically illustrates your karmic issues, your soul potential and the reason you’re on earth right now. Susan meets with you, in person or by phone, and shows you your past... and your future. She specializes in Karmic Astrology and when you’re ready to see what your “stuff” is, she’s here to help.

Once Susan has the astrological picture of your karmic issues and soul potential, she gives the pertinent information to Marcella Zinner for a past life review to determine where the “trouble spots” originated, and why they’re still holding you back or causing you problems. Susan completes the cycle with a follow-up phone session to address any new questions arising from your karmic work.

### Marcella Zinner and Past Life Regression

Marcella’s regressions are relaxing, gentle excursions into your past. She has been highly trained in regression therapy and can quickly and safely guide you to the originating soul memories of the situation you wish to heal. Because we hold on to energy thoughts in our cellular memory, they remain with us until we can “visit” them, gain a new perspective of the situation, and then release the pain of the original memory. We’re “seeing” an ancient problem with today’s eyes, with the added safety of intervening time. We do not relive the trauma, but we understand how it came to be. And then we can free it from our lives. As Marcella tells her clients, “Your psyche protects you... for what you’re ready to hear.”

When you see where they came from, you can safely and easily heal karmic issues about:

- Anger
- Fears
- Guilt
- Health
- Relationships
- Jealousy
- Prosperity
- Success
- Love
- Siblings
- Children
- Parents

### The Keys to Karma

Astrology provides the key. Past life regression unlocks the door to our “hidden” karmic issues, which are now transformed into new understanding about why things in life have happened a certain way. Why you were jealous of your sister... or disappointed with your husband... or were afraid of dogs, heights, water. And here’s the best part of all. The jealousy, once understood, goes away. The disappointments are seen in a new light. Fears of certain animals or situations dissolve and disappear. Guilt is gone.

And you step away from all these feelings you had... free to breathe and expand your life, the way you want it to be.
